

# Tech Nomination

**Margarette Langdon-Lewis**

Nominated by: Daniel Ducharme

# Biography

---

Meg is a trend setter in the auto repair industry, in particular with the Maine AutoCare segment. Meg hosts weekly videos from the shop on how to perform basic preventive maintenance and why repairs may be needed. These videos show a range of needed repairs that have come into the shop or preventive maintenance opportunities. While some videos are comical, some are of that special customer who just started hearing a noise, to the misfire that is a result of a mouse. They are posted on the shop's Facebook page for all to see.

She oversees the BDG group in the greater Belfast, Maine market. This requires lots of attention as the group moves their jointly owned tools from one shop to another in a geographically challenged area of Maine.

Meg has gained the respect of her peers in not only her shop, but in others within the region. She is assisting in the shop's newest Apprentice go through the course. Meg most definitely sets the bar for others to follow, and as a Wholesale Manager for NAPA, I am proud to have her in my territory.

## Certifications

### ASE Certifications

#### ENGINE REPAIR

Obtained: 08-25-2017

Expires: 12-31-2024

Active

#### AUTOMATIC TRANSMISSION/TRANSAXLE

Obtained: 07-20-2019

---

## **Additional Training**

Meg is currently the NAPA Tech of the year 2022. All her credentials were listed in 2022

## **Industry/Community Involvement**

### **Industry Involvement**

Everything from Autism awareness to working with trade schools for technicians. Her information is listed in the 2022 nomination.

### **Community Involvement**

Meg is very involved in the Automotive for Autism campaign. She spearheads the local chapter along with steering the BDG members and local jobber stores to collect donations for this worthwhile charity. Each year she has a visitor from the organization attend a BDG meeting to explain accomplishments from the prior year and to set expectations for the upcoming year.
